PROJECTS

- **KIF Products:** Developed a live product listing website with ReactJS, Node.js/Express.js, MySQL, and REST APIs, ensuring high performance and modular architecture. URL: <https://www.kifproducts.com>
- **Weather based AI trip planning app:** Built a cross-platform travel app using React Native, Gemini API, Redux Toolkit, and Tailwind CSS, providing AI-driven trip suggestions based on real-time weather, praised for its seamless UX.
- **Lucky Check (Android App):** Built a React Native application that scrapes Kerala lottery results using Cheerio, Node.js, and Express.js. The app fetches real-time winner details from the official lottery website, allowing users to quickly check their ticket status and prize amount. Designed for efficiency and ease of use, ensuring a seamless user experience.
- **AI Sudoku Solver using OpenCV:** Developed an AI-powered Sudoku solver using OpenCV to extract grids and a backtracking algorithm to automatically solve puzzles with minimal human intervention
