PROFESSIONAL SUMMARY

Frontend Developer with hands-on experience in ReactJS, Next.js, TypeScript, and JavaScript, specializing in building scalable, high-performance web applications. Achieved a 25% reduction in load times and a 30% improvement in form accuracy through performance optimization and efficient form handling. Skilled in role-based access control, unit testing, and responsive UI design. Strong collaborator with experience in Agile/Scrum teams, focused on delivering user-centric, maintainable software solutions.

TECHNICAL SKILLS

- **Languages:** JavaScript, TypeScript, HTML, CSS, Python, Java.
- **Libraries/Frameworks:** ReactJS, TailwindCSS, ReduxJS, NextJS, React Native, NodeJS, ExpressJS, NestJS, Jest, firebase, LangChain, LangGraph, Hugging Face, Groovy on rails.
- **Database:** MongoDB, MySQL, NoSQL, GraphQL, PostgreSQL, IndexedDB, Mongoose.
- **Cloud Technologies:** AWS Lambda, AWS Cloudwatch, AWS DynamoDB.
- **Other Skills:** Docker, Git, JIRA, Ollama, TDD, Data structures and algorithms, Responsive Web-design.

EXPERIENCE

- **MyFitApp** Remote India
Software Engineer June 2025 - Present
 - Led the migration of a legacy frontend from Groovy on Grails to React.js, resulting in a 40% improvement in UI responsiveness and reducing page load time by 30%.
 - Developed and integrated AWS Lambda functions to streamline provider services and increased code reusability by implementing modular, maintainable architecture.
- **QBurst** Kerala, India
Software Engineer Aug 2023 - June 2025
 - Developed scalable frontend solutions, reducing load times by 25% and enhancing maintainability by 20%.
 - Implemented Formik for form handling, boosting form accuracy by 30% and improving reusability.
 - Authored 100+ Jest unit tests to ensure component reliability and functionality.
 - Introduced role-based access control, enhancing security and boosting performance and user satisfaction.
 - Deployed a local Large Language Model (LLM) to ensure data privacy and enable secure internal usage.
 - Developed an AI assistant for an internal resource planner application using the locally deployed LLM, improving resource allocation efficiency and decision-making.

EDUCATION

- **Bachelor of Technology in Computer Science** CGPA: 8.22
NSS College of Engineering; Kerala, India July. 2019 – March. 2023

PROJECTS

- **KIF Products:**

Developed a high-performance product listing platform using **ReactJS** (frontend), **Node.js/Express.js** (backend), and **MySQL** (database). Designed to display real-time product listings for multiple companies under the KIF umbrella, ensuring seamless user experience, efficient data handling, and responsive UI. .

- **Weather based AI trip planning ap:**

AI-powered travel app, built with **React Native**, **Gemini**, **Redux Toolkit**, and **Tailwind CSS**, generates personalized itineraries, adapts plans based on real-time weather, and highlights key attractions. It offers a seamless, responsive, and intelligent travel experience with dynamic updates and a modern UI.

- **AI-Powered Voice Interview Platform:**

Built a voice-based interview platform using **NextJS** for the frontend, Vapi for AI-powered voice workflows, and **Firebase** for authentication and real-time data handling. Enabled users to conduct and attend AI-assisted voice interviews with real-time conversational interaction. Automatically generated personalized feedback and key improvement areas after each session, enhancing the interview preparation experience.

- **AI Sudoku Solver using OpenCV:**

Developed an AI-powered Sudoku solver using **OpenCV** for grid extraction and a **backtracking algorithm** to solve puzzles automatically with minimal human intervention.

LANGUAGE

- **Malayalam**

Mother tongue

- **English**

Professional proficiency

VOLUNTEERING

- **Dyuksha20 General Works and Department Exhibition**

NSS College of Engineering; Kerala, India

- **Dyuksha23 General Works**

NSS College of Engineering; Kerala, India
